ONLINE REALTIME ACCESS CONTROL MANAGEMENT

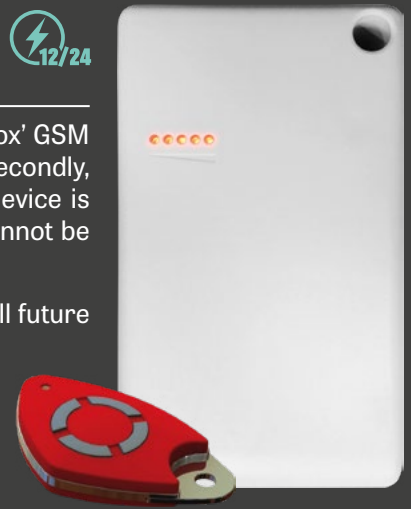

RADIO RECEIVER KIT 06-0129-EN

The HF Receiver Kit comprises of 2 parts housed in a single unit. Firstly, the 'Intrabox' GSM unit which stores data locally, but can be updated through its GPRS connection. Secondly, the HF Radio module which communicates and decodes the transmitters. Each device is uniquely coded and once programmed in via the online management suite, they cannot be programmed by another user.

This feature allows for sole management over a site / installation and guarantees all future sales of remotes to be directed through the installer.

- ▶ 868Mhz remote controls
- ▶ Dial to open feature
- ▶ Up to 10,000 users
- ▶ 3 month event log
- ▶ 2 NO relay outputs
- ▶ Email alerts
- ▶ 12-24V AC/DC
- ▶ 10 years FREE data

PROXIMITY READER KIT 06-0131-EN

The Proximity reader kit is composed of 3 parts. Firstly, the 'Intrabox' GSM module which can be updated through its GPRS connection. Secondly, the Mifare reader, which can be mounted flush or surface with the addition of a back-box (optional extra). Thirdly, the relay card, which releases the door / gate it is operating and stores local proximity card codes.

Each device is uniquely coded, ensuring security over who can access and program proximity tags into the system.

With the ability to remotely add/change/delete proximity tags, this system gives your customer the freedom of choice for entry options.

- ▶ Mifare proxy tags
- ▶ Up to 1,000 users
- ▶ 3 month event log
- ▶ 1 NO / NC relay output
- ▶ Email alerts
- ▶ 12-24V AC/DC
- ▶ 10 years FREE data

KEYPAD KIT 06-0130-EN

This new addition to the Intratone range also offers a variety of means for accessing an entrance. The keypad can store up to 80 separate codes, which can be split into time ranges across a 7 day period (including holiday's which can restrict use).

The GPRS module has an integrated RF module for the use of radio remote controls and also mobile entry as standard. This variety of access options offers the end user the freedom to choose how they want access to a door / gate.

All information stored is programmable via the online management suite, which offers security and data event logging.

- ▶ 868Mhz remote controls / mobile phone entry / coded entry
- ▶ Up to 10,000 users
- ▶ 2 NO relay outputs
- ▶ Email alerts
- ▶ 12-24V AC/DC
- ▶ Max. number of keypad codes 80
- ▶ 10 years FREE data

WHAT IS THE **ONLINE MANAGEMENT SUITE**, AND WHAT ARE ITS KEY FEATURES?

THE INTRATONE REAL-TIME MANAGEMENT SUITE allows the installer to take full control over their installations. This is provided by means of an online service which can program your intercoms, keyfobs, proxy tags, keypad codes and mobile entry numbers directly to the 4G/GSM unit supplied in every kit. On top of this impressive facility, the 4G/GSM device supplied comes complete with SIM and 10 years' worth of data/calls for access products (15 years for intercoms) at no extra cost.

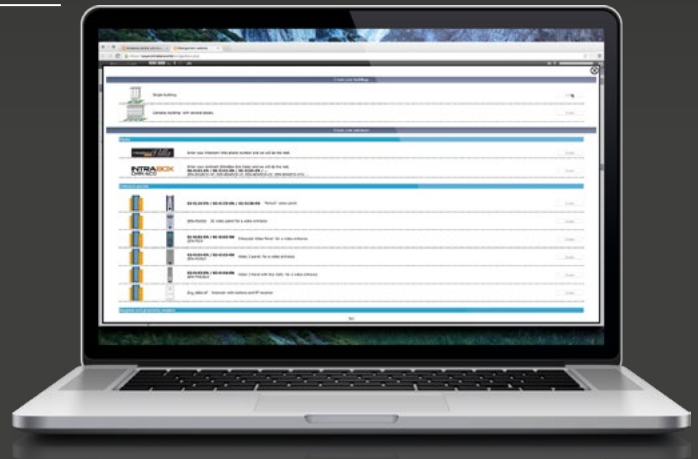

The website is free to use, and comes packed with features to enable easy configuration, monitoring and updating of the full range of Intratone access control and intercom products.

MANAGE ALL OF YOUR SITES FROM ONE CENTRAL LOCATION! NO SITE VISITS, NO ONGOING COSTS, NO HASSLES!

FEATURES INCLUDE:

- ▶ Realtime changes
- ▶ Event log viewing
- ▶ Enabling/disabling
- ▶ Easy adding of users
- ▶ Time range management
- ▶ User group management
- ▶ Master controls for multi-sites
- ▶ Holiday ranges

INTERCOMS & KEYPADS

INTRACALL AUDIO INTERCOM (1 BUTTON)

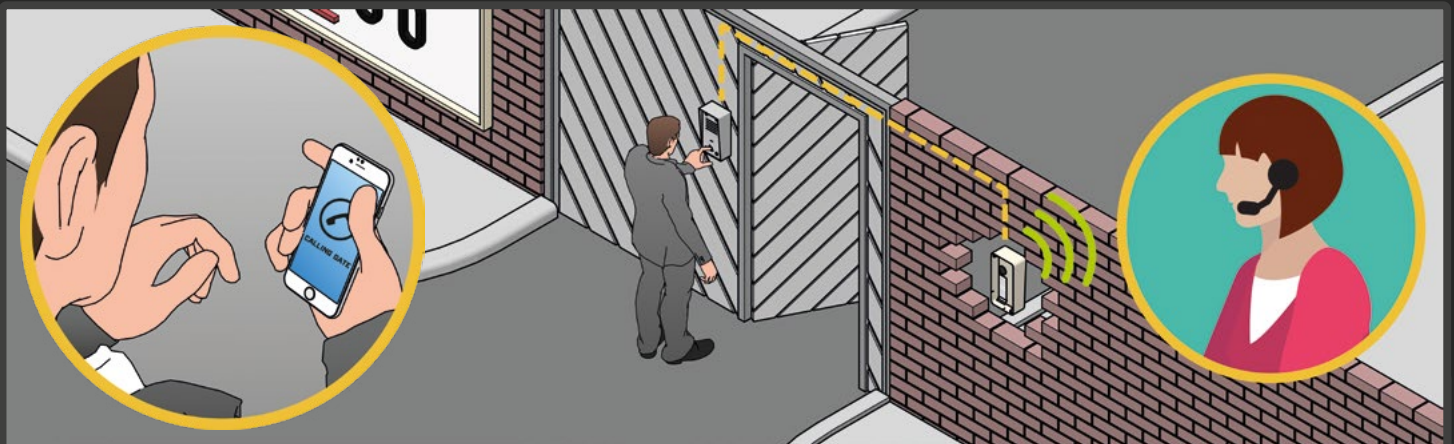

The 'Intracall' intercom is a cost effective and easily managed GSM solution for door and gated entries. Not only is the system programmable via the online management suite, but also has integrated dial-to-open mobile phone entry. This is programmable for up to 1000 users.

The key benefit of this system is the 15 year call plan included FREE with the cost of the kit. This means no monthly costs for 15 years!

- ▶ Discreet profile (Only 88mm Wide)
- ▶ Calls 7 pre-programmed numbers per day
- ▶ Dial-to-open entry for up to 1000 users
- ▶ 1 x relay output
- ▶ Flush fitting (optional surface box available on request)
- ▶ 12-24V AC/DC

15 YEARS!
UNLIMITED CALLS & UPDATES

USERS WHO ARE GIVEN AN ACCESS NUMBER CAN CALL THE INTERCOM FOR AUTOMATIC ENTRY

DDA AUDIO INTERCOM WITH KEYPAD & PROXIMITY READER

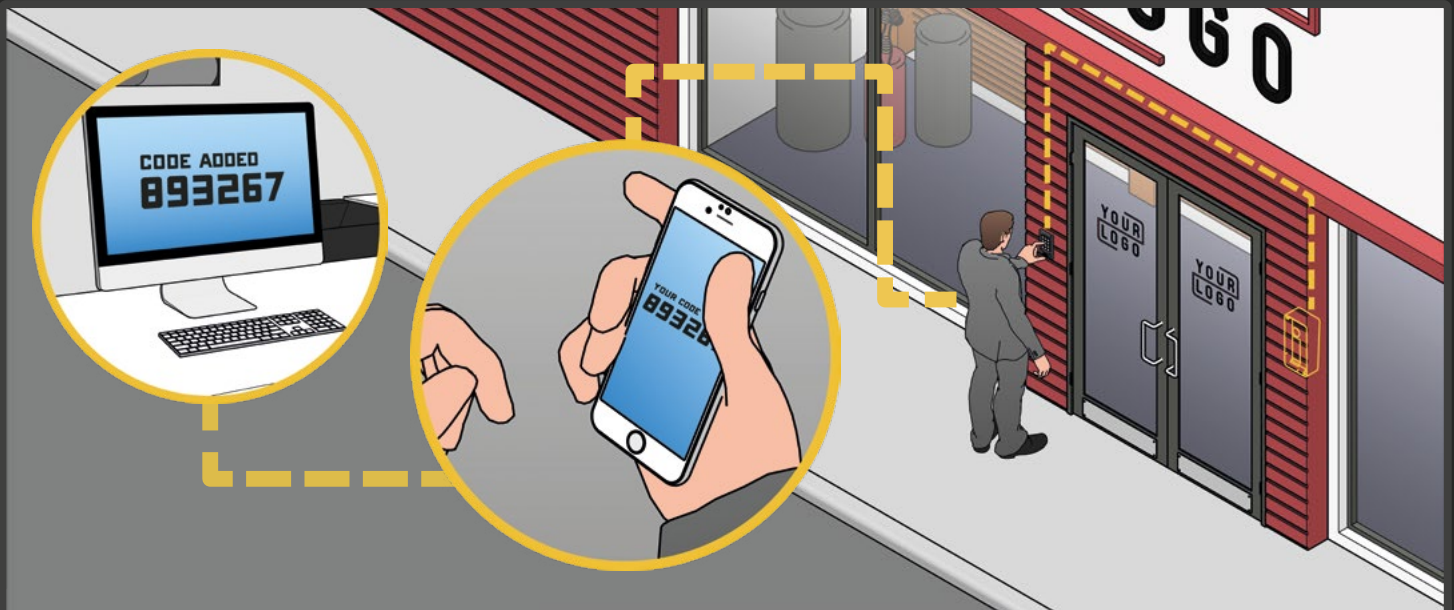

The DDA Audio intercom is a cost effective and easily managed GSM solution for door and gated entries. Not only is the system programmable via the online management suite, but also has integrated dial-to-open mobile phone entry.

The stainless-steel finish offers vandal resistance and weather resistance with a refined aesthetic look. Includes keypad and prox reader.

- ▶ High quality stainless steel finish
- ▶ Up to 40 keypad codes
- ▶ Proximity reader integrated
- ▶ Dial-to-open for up to 1000 users
- ▶ 1 x relay output (add up to 4)
- ▶ Priced per dwelling, please call for quote
- ▶ 12-24V AC/DC

15 YEARS!
UNLIMITED CALLS & UPDATES

USE THE **MANAGEMENT SUITE** TO SET UP TEMPORARY ACCESS CODES FOR NEW STAFF, CLIENTS, OR EVEN GUESTS. EASILY REMOVE AFTER USE FOR INCREASED SECURITY.

RENO VIDEO 4G INTERCOM WITH KEYPAD & PROXIMITY READER

The 'Reno' range is one of the more advanced series of intercoms we have to offer. It comes packed with features allowing for full colour video and audio calls to be made to any iOS or Android device. The data plan included in the price means no ongoing costs to the customer for 15 years! This includes all calls and updates made.

The callpoint consists of both coded keypad and proxy reader for end users with a digital scrolling display. Operational messages may also be programmed such as 'Call in progress'.

- ▶ Up to 40 keypad codes
- ▶ Mifare proxy / coded keypad / Mobile phone entry
- ▶ Up to 7,000 users (on prox & mobile Entry)
- ▶ 1 x relay output (add up to 4)
- ▶ Flush fitting (optional surface box available on request)
- ▶ 12-24V AC/DC
- ▶ Priced per dwelling, please call for a quote

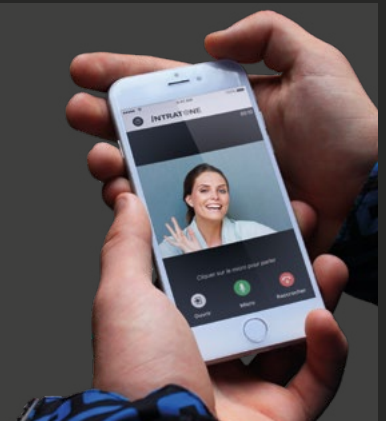

▶ **15 YEARS!**
UNLIMITED UPDATES

INTRATONE

MY INTERCOM APP KNOCK KNOCK!

The "My Intercom" app lets you see visitors directly on your smartphone or tablet, and gives you the ability to remotely allow or deny entrance to the caller.

PREDATOR WIFI

WI-FI VIDEO INTERCOM

The AES Predator Wi-Fi System offers high quality video communication to all mobile devices operating on iOS or Android technology. The Wi-Fi transmitter supplied with the kit can achieve a maximum range of 60m (dependant on the range of the router it is communicating with). Other technologies such as powerline adapters, or point-to-point Wi-Fi links can be used to increase this range and provide stable connections in areas prone to interference.

- ▶ 24V DC (adapter included)
- ▶ 1 relay output (NO & NC)
- ▶ Adjustable relay timings (1-10 Seconds)
- ▶ IP55
- ▶ Infrared illumination for nightmode
- ▶ Keypad optional (3 x relay outputs)

CELCOM PRIME

3G GSM INTERCOM

One of the newest key features is the free app available for download on Android and iOS. This app allows you access to all programmable features for the intercom, including keypad access codes, phone numbers for dial in / dial out, and the latest functions 'do not disturb' and 'out of hours'.

With all of these functions available on the app, this allows the programming of this intercom to be carried out within seconds and in a much more user friendly way.

- ▶ 15V DC (adapter included)
- ▶ 2 relay output (NO & NC)
- ▶ Dials out up to 4 numbers
- ▶ IP55
- ▶ Dial to open functions up to 100 users
- ▶ Modem models 2G quad band, 3G EU, 3G USA

AES DECT 603

WIRELESS AUDIO INTERCOM

The Dect 603 range is a radio based wireless intercom system that can operate with up to 4 handsets and has a maximum range of 250m. Being a 'dect' system significantly reduces the price when ordering multiple handsets for a single dwelling.

This range is also now available for multi-residence with kits available up to 4 way. Please contact us for further options available for this kit.

- ▶ 12-24V DC (adapter included)
- ▶ 2 Relay output (NO & NC)
- ▶ Adjustable relay timings (1-9 Secs)
- ▶ IP55 on speech module, IP65 for transmitter module
- ▶ Keypad optional (3 relay outputs)
- ▶ 1.88GHz digital technology

DAITEM SC902AU

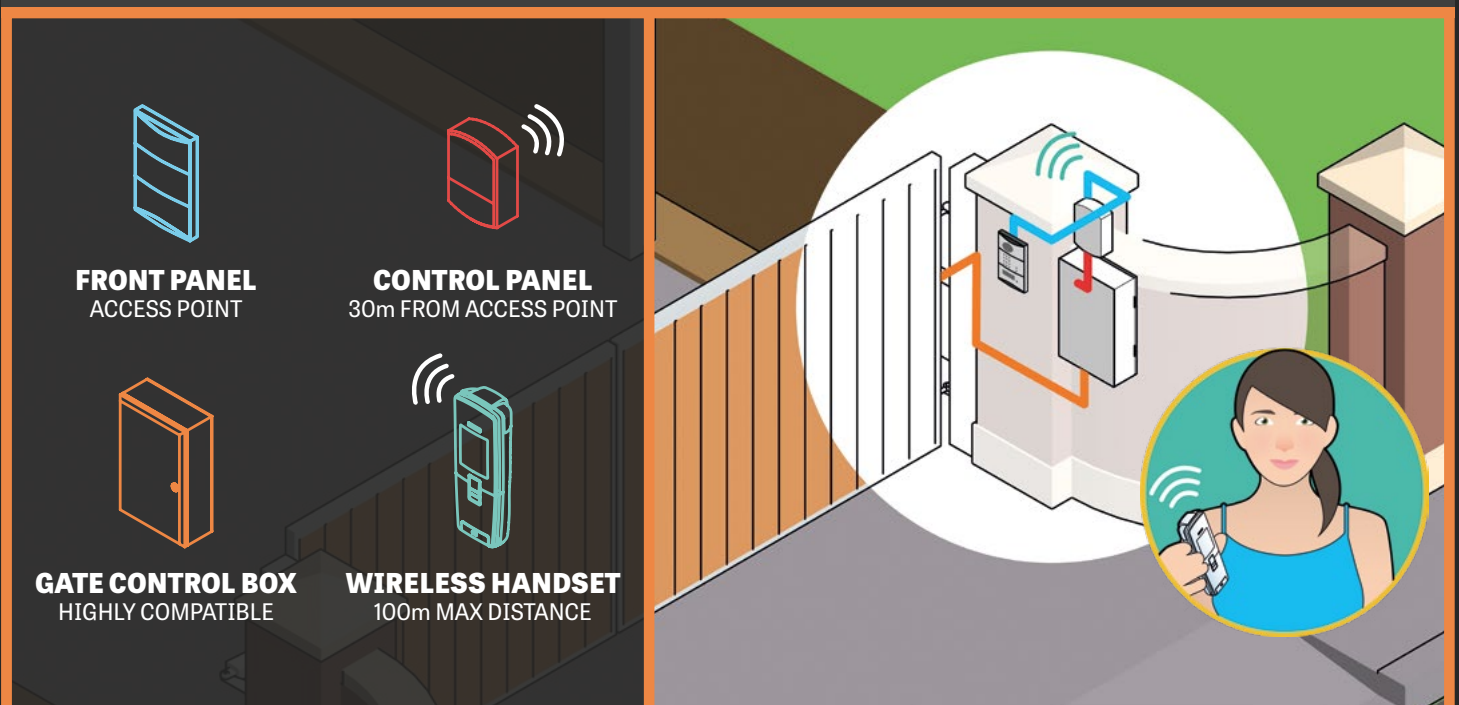

WIRELESS AUDIO SYSTEM & KEYPAD

The SC902AU is a sturdy wireless audio kit comprised of a MHF02X keypad and audio front panel combo, a wireless controller and SC100AU wireless audio handset, a vandal resistant faceplate to protect the front panel, and a SH804AX proximity key-fob for ease of access.

The kit is easy to use and is simple to set up and maintain. With the option to activate the door or gate release, and even turn on lighting via the designated buttons on the handset.

- ▶ Up to 250m range
- ▶ Electric lock / clean contact output
- ▶ Built in proxy reader
- ▶ Up to 4 call stations
- ▶ Up to 4 handsets per controller

FARFISA 1PEXFD

AUDIO INTERCOM SYSTEM

The Farfisa 1PEXFD intercom is a one way audio kit, with Exhito indoor station (EX321) and Profilo external station (PL11PED), equipped with access and control keypad (FC52PL). This model also includes a surface mount back box.

- ▶ **2 Wire audio system**
- ▶ **Integrated backlit keypad (2 x relays)**
- ▶ **Up to 200m**
- ▶ **Rain shelter included**
- ▶ **Clean contact output / 12V output**

VIDEX DK4K1S/CL

AUDIO INTERCOM SYSTEM

The Videx 4000 Series audio entry kit with 3 code, 3 relay coded access keypad and 1 call button and back lit name plate. Features include electronic call tone and timed door release (1-99 seconds or latching).

The kit comprises an entry panel, a telephone and AC PSU. The telephone includes a three position volume control and is wall mountable. Up to 2 additional handsets can be connected in the same apartment. The programming of access codes is carried out using the codelocks keypad, codes can be 4-8 digits.

- ▶ **3 Wire audio system**
- ▶ **Backlit keypad (3 x relays)**
- ▶ **Surface mount**
- ▶ **Built-in lock relay**

EASYBKA/EASYBKR

ANTI-VANDAL KEYPAD

Our "EASY" range of keypads cover all needs, from standalone to online, including advanced features such as selectable backlighting, heating, anti-tamper and bypass mode. This keypad has proven its deserved status as our best seller.

Available with either pre-formed 1.5M cable or terminal connections, all three having fully potted/sealed electronics providing maximum all weather protection.

ANTI-VANDAL DESIGN

STANDALONE ACCESS CONTROL SYSTEMS

At EasyGates Direct we pride ourselves on our access control knowledge, providing anything from a simple replacement remote control all the way through to advanced GSM based access control systems for thousands of users. Our expert pre-sales technical team are available over the telephone or can visit a site with you to provide advice and customised solutions.

PRASTEL RADIO REMOTE CONTROL SYSTEMS

Our Prastel radio range enables the installer to provide secure coded systems that are scalable and cost effective. Each receiver can be coded with a unique installer ID and each remote laser etched with the installer logo and contact details, ensuring repeat business is maintained.

PROX/RADIO COMBINED SYSTEMS

M2000-BT BLUETOOTH ACCESS CONTROLLER

The M2000-BT is an access control unit. It includes a 2000-user memory, 2 external reader inputs and a 433 MHz radio receiver.

The key innovation lies in the simple and wireless unit management and programming (via Smartphone).

- ▶ 2000 users
- ▶ Built-in 433 MHz radio receiver
- ▶ 2 Wiegand reader inputs 26, 30, 37 bits or data clock
- ▶ 4 auxiliary inputs (2 push-buttons, 2 magnetic loops)
- ▶ Anti-passback (hard)
- ▶ Event recording (3000 entries, FIFO)
- ▶ 8 User time slots, 32 groups, Holidays & special days
- ▶ Programming: via smartphone (compatible with Android® and iPhone®) management of user full names, programmable time slots and event visualisation
- ▶ ABS box with double hook : screw or DIN rail mount

THERE'S AN APP FOR THAT

MR-GSM ONLINE RADIO CONTROLLER

The MR-GSM Prastel access control unit can manage the site memory content remotely and in real time via GPRS network.

With the WinAccess software connected to the Internet, the site administrator can carry out many operations on the connected modules: addition, replacement, removal, history of transmitter numbers, badge numbers and accepted or denied codes.

- ▶ Built-in 433.920 MHz radio receiver, 2 channels
- ▶ 1000 code memory
- ▶ Modem GSM/GPRS 4 bands
- ▶ Wiegand or 2 alarm inputs
- ▶ Connect up to 6 MR series receivers on RS485 bus

MPROXMINI PROX READER (M2000-BT & ALL MAJOR BRANDS)

FLUSH MOUNT
STEEL ENCLOSURE
AVAILABLE

MPROXMINI is a 125 kHz proximity reader, compatible with all access control units that accept Wiegand 26/30 bit or data clock protocols.

All the electronic components and the internal antenna are assembled in a completely resinated case that offers a high degree of weather resistance (IP67).

- ▶ 12Vdc power supply
- ▶ 20 mA power consumption
- ▶ -20°C / +55°C operating temperature
- ▶ IP67 protection rating

INTRATONE RADIO SYSTEM INTRATONE RECEIVER MODULE + USB PROGRAMMING UNIT

The Intratone 07-0106 RF receiver module facilitates not only a cost effective means for radio access control, but also offers security with its 'read / write' technology. This enables the owner / installer to program remote fobs from the office and ship directly to site without any callouts and tedious local programming into the receiver. All of this can be managed online, so if a remote is lost, a replacement can be programmed and dispatched in its place rendering the missing one obsolete and no longer functional. The easy to use USB programmer enables swift execution of configuring remotes, so large jobs with multiple remote fobs can be catered for in no time at all.

The receiver itself boasts an impressive 2500 users, programmable relay timings, 2 NO relay outputs, external antenna input, and an IP67 enclosure. The key feature of this receiver is that all future sales of remote fobs must be directed through the account holder for the online management area. This offers guaranteed repeat sales, and more importantly additional security on every installation.

- ▶ **Voltage: 12/24V AC DC**
- ▶ **Frequency: 868Mhz**
- ▶ **Rating: IP67**
- ▶ **RF type: rolling code**
- ▶ **Size: 90mm x 129mm x 37mm**
- ▶ **Output: 2 x NO Relays**

ENQUIRE TO UPGRADE YOUR GATE AUTOMATION KIT

ELDES ESIM320 GSM SWITCH CONTROLLER

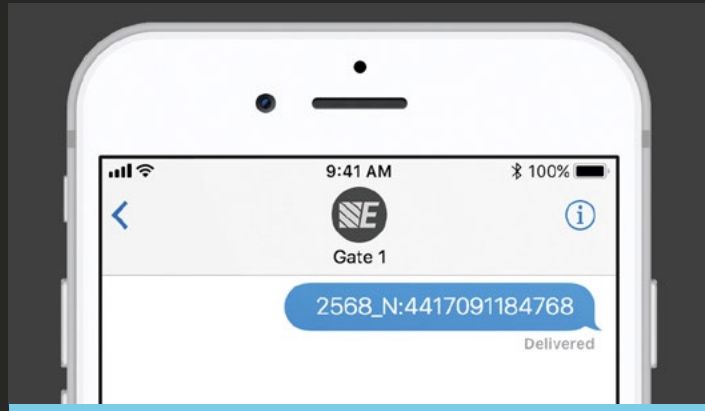

The ELDES gate controller is a remote GSM and GPRS device, that allows remote triggering of configured outputs. The Relays can be activated by an authorized phone call, text message or mobile application (iOS and Android).

Up to five administrators can configure the device via the internet or SMS, where they can add/maintain up to 2000 users. 8 timed/scheduled access periods can be customised to authorise or refuse activation requests.

The ELDES gate controller can be used for a multitude of applications, but was specifically designed to operate barriers and garage doors.

- ▶ Dial to open gates (no phone costs)
- ▶ Use caller ID to identify user
- ▶ SMS notification of fault/failure
- ▶ Domestic & commercial application
- ▶ Various enclosure options
- ▶ Event log
- ▶ No response if number not recognised
- ▶ Schedule timed automatic operation
- ▶ 2 Relays, 3 Inputs
- ▶ Demonstration videos on YouTube

ENCLOSURES

FIBOX ARCA CABINETS

The FIBOX ARCA cabinets are a range of high quality enclosures for the packaging and protection of electrical and electronic components and systems. Enclosures come with standard shelf configuration.

The high performance UV stabilised polycarbonate cabinets are lightweight, long lasting, chemical resistant, and non corrosive for use in harsh and demanding environments. The cabinets are also water and high impact resistant for protection against vandals and the elements.

▶ DOOR

- Door opening angle 120°
- Both landscape and portrait option
- Pre-formed fixing studs inside
- Easy access to contents

▶ LOCKING

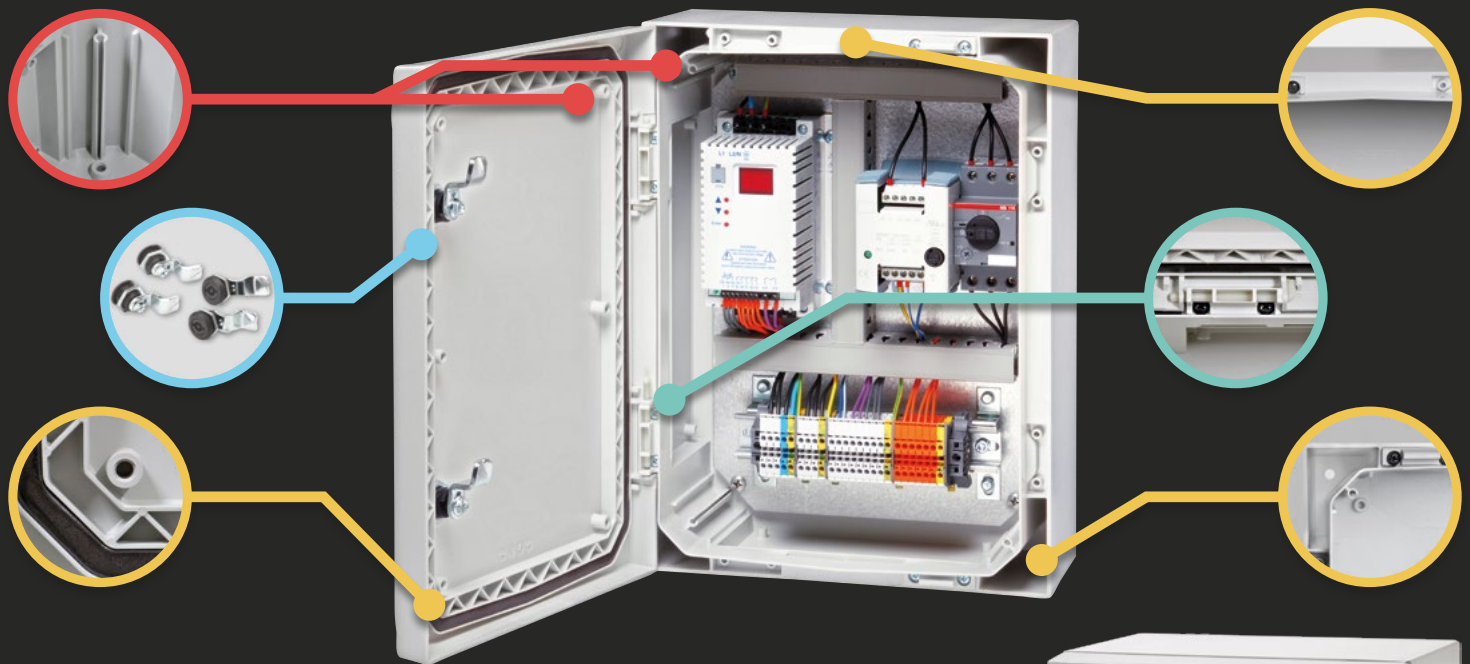

- Double-bit
- Changeable lock inserts

▶ MOUNTING PODS

- On the base, cover and four base sides

▶ GASKET

- Wide and secured gasket with PUR material for high quality sealing
- Special molded rib design makes the cabinet stable and solid
- Double corner to secure fixing without destroying the IP rating
- Declined base design for better waterproofing
- Patent pending hinge design for easy assembly and refined appearance
- Robust and rigid cabinet

ELECTRIC AND MAGNETIC LOCKS

ELETTRIKA ELECTRIC GATE LOCKS

1A721

1A731

The CISA Elettrika has a pull resistance of up to 2000kg, excellent vibration resistance and impact strength thanks to its protective steel case, which completely encloses around the lock and striker. The Elettrika is 'non-handed' and with an available backset from 50mm to 80mm.

- ▶ **Electric hold open function**
- ▶ **Backset can be regulated from 50mm to 80mm**
- ▶ **12V AC**
- ▶ **Holding force of 2000KG**
- ▶ **Strong steel exterior casing**
- ▶ **Rotary hook deadbolt**
- ▶ **Fail secure**

NICE PLA10 & PLA11

Nice

The PLA10/11 electric locks were specially designed for installation on manual or automatic outside outward opening doors and drive-through gates. This type of opening is necessary when the door/gate is situated on a slope or when safety regulations foresee an outward-opening escape route in the event of an emergency. The characteristics and finish make it ideal for installation even in surroundings subject to considerable temperature ranges.

- ▶ **12V AC 15VA**
- ▶ **1.3Kg**
- ▶ **65mm x 33mm x 120mm**
- ▶ **Galvanized steel case & cover**

ELKA LOCKS OPTIMUM SAFETY DEVICES

The **M315** is an ELKA motor lock that has a stroke of 150mm with a stainless steel pin 30^omm, complete with an emergency release by standard type cylinder lock. Includes MO90 controller.

- Reporting back OPEN/CLOSED to access possible, complete with controller MO90
- For universal use with all gate controllers with warning light connection
- Pre-warning time (potential-free or 24V or 230V)
- ▶ **24Vdc**
- ▶ **(LxWxH) 146mm x 146mm x 440 mm**
- ▶ **13.0kg**
- ▶ **Max. 150mm stroke**
- ▶ **Stainless steel pin 30^omm**

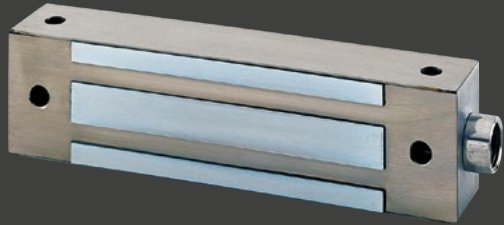

The **E205** is an ELKA electromagnet bolt lock system. Complete with stainless steel pin 20^omm, 50mm stroke, for all ELKA-24V swing gate openers and can lock either down, sideways or up.

- For all ELKA-24V swing gate openers
- Locks up, down and sideways
- Stainless steel pin
- 50mm stroke
- Emergency release with key (cylinder lock)
- ▶ **24Vdc (alternating current)**
- ▶ **(LxWxH) 58mm x 92mm x 298 mm**
- ▶ **IP43 rating**

MAGNETIC DOOR LOCKS

ES400/500

Features: **ES400** - 400KG **ES500** - 500KG

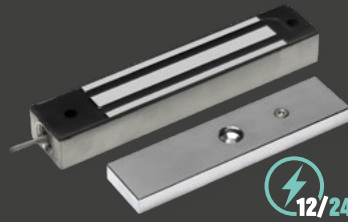

- ▶ Stainless steel construction. (IP54)
- ▶ Fail safe & monitored
- ▶ Electronics internally protected
- ▶ Flush and surface versions
- ▶ Face & side mount (surface magnets)

Technical Specifications:

- ▶ **Voltage:** 12 /24Vdc
- ▶ **Current:** 12Vdc: 550 mA
24Vdc: 225 mA

GL850/1200

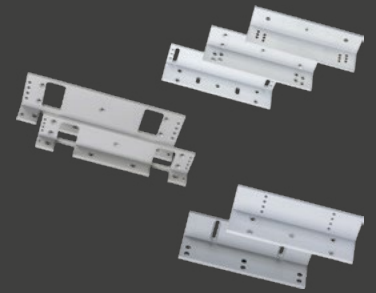

Features:

- ▶ Max holding force **363kg/ 544kg**
- ▶ **Stainless/ brushed stainless steel**
- ▶ Monitoring sensor
- ▶ Standard fixing

Technical Specifications:

- ▶ **Voltage:** 12Vdc/24Vdc
- ▶ **Current:** 12Vdc: 500 mA
24Vdc: 250 mA

Z&L BRACKETS

Our range of Z & L Brackets provide multiple mounting solutions for 180/300/400 & 500kg Magnetic locks.

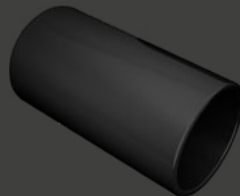

- ▶ **Satin anodised aluminium**
- ▶ **Powder coated steel** (external magnets)
- ▶ Adjustable/ architectural and external brackets
